Complete Logistics Solutions

Our Mission and Vision

Sahl Delivers Value and Peace of Mind for Your Business

By offering great service products that enrich our customer experience and differentiate our brand

Progressive Logistics

Aligned with the Vision 2030, companies striving to capture the potential of Saudi Arabia's economic growth need a progressive logistics player. A value-added partner who comprehends the landscape and has the capability to overcome market challenges.

We deliver smart supply chain solutions through comprehensive client industry expertise, seamless processes, and a fully integrated IT infrastructure. From contract logistics to home installations, personal touch and reliability are the hallmarks of our approach.

We simplify complex supply chains.

A progressive logistics partner providing instrumented, interconnected, and intelligent solutions that enable businesses to grow and stay ahead.

**National Industrial
Development and
Logistics Program**

Who We Serve?

B2B

SAHL helps to create a positive lasting brand impression Complementing our clients desired value proposition. Additionally, our innovative technology gives you and your customers real-time, end-to-end visibility and tracking into the transportation and delivery of your products.

B2C

- * Bulk Delivery Service
- * Ecom (Parcel) delivery Service
- * Hookup/install (appliances)
- * Unboxing /removal of packaging in home
- * Assembly in home

Transportation

Our transportation fleet supports the linehaul and fulfillment operations for our clients across the kingdom. We move hundreds of FTL an LTL consignments on daily basis to connect ports, terminals, fulfillment centers, logistics hubs, and clients' stores and wholesalers.

Value Add Services

To complement our first & last mile operations, we offer value added services such as furniture and kitchen assembly, light plumbing, as well as light electrical works which can be done at the customers' residential or workplaces.

First & Last Mile Operations

We are managing hundreds of collection as well as delivery orders every day. Our first and last mile operations are supported with a network of 500+ vehicles and 12 carefully-positioned logistics hubs across the kingdom in addition to a system-driven operation where collection and delivery requests can be planned, broadcasted, and updated in real-time basis.

Ecosystem

We use a comprehensive and fully converged technology solution to drive our warehousing and logistics services as well as back office processes. This technology Ecosystem allows us to integrate our clients supply chains to unlock multi and omni-channel retail and fulfillment capabilities. Establish full visibility over planning and execution activities which allows performance optimization, and enable linking all execution elements in the supply chain
